Separate paging is given to this Part in order that it may be filed as a separate compilation

PART III—SECTION 2

Notifications and Notices issued by the Patent Office
relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 6th February 1960

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

21st January 1960

- 70460. Unilever Limited. Hydrogenation process. (23rd January 1959).
- 70461. Commissariat A L'Energie Atomique. A magnetic coupling for transmission through a plane wall.
- 70462. J. R. Geigy A.-G. Process for the production of reactive dyestuffs.
- 70463. The Dow Chemical Company. Improved magnesium battery anode and magnesium battery.
- 70464. United Kingdom Atomic Energy Authority. Improvements in or relating to nuclear reactors. (29th January 1959).
- 70465. Merck & Co., Inc. 16-methyl derivatives of progesterone and a process for the manufacture thereof. (2nd March 1959).
- 70466. Associated Electrical Industries Limited. Improved axial locating means for rotatable machine shafts. (22nd January 1959).
- 70467. G. D. Searle & Co. Process for 6-methyl-17- α -acyloxy-4,6-pregnadiene-3, 20-diones.
- 70468. Lee-Norse Company. Mining machine. (1st January 1960).
- 70469. Beecham Research Laboratories Limited. Improvements in or relating to penicillins. (22nd January 1959). [Addition to No. 64824].
- 70470. Ciba Limited. Pharmaceutical preparations containing a new guanidine compound. [Divisional date 6th August 1958].

22nd January 1960

70471. G. M. Jhavar. Improvement in or relating to electric table fans.
70472. Messrs. Shri Krishna Cast Iron and Brass Works. Improvement and modification in the manufacture of ball bearing top rollers used in spinning frames in textile industry.
70473. Standard Pharmaceutical Works Ltd. Improved process for producing penicillin.
70474. May & Baker Limited. New pyrazole derivatives. (22nd January 1959).

70475. May & Baker Limited. New piperazine derivatives.
(22nd January 1959).
70476. PECHINEY Compagnie de Produits Chimiques et Electrometallurgiques. Process for the manufacture of loads for oxido-reducing treatments.
70477. Associated Electrical Industries Limited. Improvements in and relating to electric brush gear.
(28th January 1959).
70478. B. P. Asar. Doors or shutters, and more particularly to rolling type of shutters.
70479. Council of Scientific and Industrial Research. Preparation of a non-shrinking and low expending cement.
70480. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the manufacture of dyestuffs.

25th January 1960

70481. R. A. Cole Private Limited. Flame resistant vinyl polymers.
70482. Preparation Industrielle Des Combustibles. Improvements in or relating to electromagnetic conveying process.
70483. Ministerul Industriei Petrolului Si Chimiei. Method for preparing sodium sulfonacetamide.
70484. V. A. Nair. Opaline depolished glass.
70485. P. M. Mehta. Improved electric geyser
70486. M. H. Mirza. Utilizing the gravitational force to run an engine which may be called gravitational engine.
70487. M. H. Mirza. A new cinematographic technique to obtain better vision on the screen named existavision.
70488. Shell Internationale Research Maatschappij N. V. Process for the polymerization of olefinically unsaturated hydrocarbons, and process for the preparation of catalysts therefor.
70489. "Shell" Research Limited. Improvements relating to the stabilization of glycols. (28th January 1959).
70490. Imperial Chemical Industries Limited. New azo dyestuffs. (16th February 1959).
70491. Sulzer Freres, Societe Anonyme. Apparatus for establishing a clear view.
70492. Schweizerische Lokomotiv-und Maschinenfabrik. Improvements in or relating to crankshaft bearing cap supports in a multi-cylinder reciprocating engine.
70493. United States Atomic Energy Commission. Concentric tubular fuel element.
70494. United Kingdom Atomic Energy Authority. Improvements in or relating to the production of metals by electrolysis.

70495. National Lead Company. Cellulose-polyolefine compositions and process for making same.
70496. International Computers and Tabulators Limited. Improvements in or relating to data handling equipment. (4th February 1959).
70497. Shyamapada Mukherjee and J. C. Bhargava. The preparation of lactic acid from sugarcane molasses.
70498. Punjab Niryat Ayat Private Ltd. Coffee percolator.
70499. Mrs. Dildar Bhagwant Singh. Curtain rail.
70500. Magnesium Elektron Ltd. A method for the production of a master alloy suitable for introducing zirconium into magnesium.
70501. Societe De Prospection Electrique, Procèdes Schlumberger. Improved method of and apparatus for borehole logging. (26th January 1959).
70502. W. A. Sheaffer Pen Company. Improvements in and relating to fountain pens.
70503. Pirelli Societa Per Azioni. Improvements in or relating to pneumatic tyres.
70504. S. G. Harrison. Plural-parts molded shoe structures.
70505. S. G. Harrison. Shoe structure having molded-basic units
70506. Sandoz Ltd. Process for the dyeing, padding and printing of cellulosic fibers.
70507. C. V. Fosberry. Improvements in or relating to electric steam boilers, electric geysers and like electric heating appliances.
27th January 1960
70508. H. L. Parikh. Metal sheathed electrical heating units.
70509. Elofflock Oberflächenveredlung Gesellschaft Mit Beschränkter Haftung. Improvements in or relating to the electrostatic coating of cord like products.
70510. International Business Machines Corporation. Reel mechanism for typewriter ribbons. (22nd June 1959).
70511. O. R. Groves Limited. Improvements in and relating to the dispensing of liquids. (4th February 1959).
70512. United Kingdom Atomic Energy Authority. Improvements in or relating to the recovery of uranium. (3rd February 1959).
70513. Albright & Wilson Limited. Improvements in or relating to the production of ceramics. (6th February 1959).
70514. Imperial Chemical Industries Limited. New dye-stuffs.
70515. M. Amirault and P. Destoumieux. Improvements in centrifugal pumps.
70516. Merck & Co., Inc. Steroid production. (20th February 1958). [Divisional date 15th October 1958].
70517. The Textile & Allied Industries Research Organisation. Cotton cleaning machine for use in cotton ginning and pressing factories.
70518. Commissariat A L'Energie Atomique. An extrusion process and device. (27th January 1959).
70519. Clayton Dewandre Company Limited. Improvements in or relating to compressors. (30th January 1959).
70520. Chas. Pfizer & Co., Inc. Improvements in or relating to penicillin compounds.
70521. Chas. Pfizer & Co., Inc. Tetracycline compounds and the preparation thereof.
70522. Rohm & Haas Company. Process for preparing cross-linked copolymeric structures.
70523. Rohm & Haas Company. Process for preparing novel monoglycidyl ethers and process for crease-proofing and shrinkage-stabilizing fabrics by means of these ethers.
70524. Probodh Kumar Seal. Improvements relating to the containers for packaging of tea, coffee and the like.
70525. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to transistor alternating-current amplifiers.
70526. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to processes for the preparation of amidophosphoryl compounds and of compositions comprising these compounds for combating noxious organisms.
70527. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to devices for fractionating gas, more particularly for obtaining liquid oxygen from air.
70528. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to party lines.
70529. Ciba Limited. Derivatives of 3:4-dihydro-1:2:4-benzothiadiazine-1:1-dioxide and process for their manufacture.
70530. E. G. Irwin and Partners Limited. Improvements relating to seats, particularly aircraft passenger seats.
70531. George Fletcher and Company Limited. Improvements relating to heat exchangers. (1st January 1960).
70532. Schenectady Varnish Company, Inc. Coated conductors, compositions therefor and methods of preparing and applying the same.
70533. Y. C. Yuen. Improvements in or relating to heat insulation panels or units. (10th February 1959 and 11th May 1959).
70534. Merck & Co., Inc. New pyridinium quaternary salts.
70535. American-Marietta Company. Hydraulic cement additives and cement compositions containing same.
70536. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Unsaturated halogen compounds and a process for the manufacture and conversion thereof. (6th February 1959).
70537. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of unsaturated alcohols and esters thereof.
70538. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Preparation of cobalamins.

Alteration of Date

64809. The claim to priority date 9th September 1957 has been abandoned and the application dated as of 31st July 1958, the date of filing in India.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

64702. Babcock & Wilcox Limited. An improved method of pulverising solid material and improvements in pulverising mills. (1st August 1957). Accepted on 19th January 1960.

Which includes feeding the material to the mill, including a rotary casing containing a charge of free pulverising elements.

64706. Chas. Pfizer & Co., Inc. Preparation of acyloxyated derivatives of 1, 2, 3, 4-tetrahydrophenazine N, N'-dioxides and 2, 3 dimethylquinoxaline N, N'-dioxides. Accepted on 20th January 1960.

By reacting dibromo-tetrahydrophen-azene-N, N'-dioxide or Bis (bromomethyl) quinoxaline-N, N'-dioxide with tertiary amine and alkanolic acid.

64720. The General Electric Company Limited. Improvements in or relating to metal vapour electric arc converters, (29th July 1957). Accepted on 20th January 1960.
- Comprising a pool container defining an annular channel provided with radial baffles interrupting the surface of the metal whereby to prevent swilling of the pool.*
64733. Montecatini Societa Generale Per L'Industria Mineraria E Chimica. Improved rope or cord and a method of manufacturing the same. Accepted on 21st January 1960.
- A sheath of isolactic polypropylene shrunk onto a core of natural fibres.*
64751. Montecatini Societa Generale Per L'Industria Mineraria E Chimica and K. Ziegler. Improved process for the preparation of high molecular weight copolymers of olefins. [Addition to No. 59172]. Accepted on 21st January 1960.
- Employing catalyst produced by contacting a solid transition metal compound of group IV, V, or VI with a metal alkyl compound of group II or III of the periodic table.*
64807. Oliver Pell Control Limited. Vibratory electric motor. Accepted on 20th January 1960.
- Two opposed and similar armatures hingedly connected to the stator unit for movement towards and away from each other under intermittent magnetic force, a coupling for two armatures.*
64808. The British Cotton Industry Research Association. Improvements in or relating to positive double-lift openshed dobbies for looms for weaving, (1st August 1957). Accepted on 22nd January 1960.
- Each hook in association with secondary hook formation and the baulk end constitutes a front stop and a back stop.*
64809. Baltaz Carl Von Platen. Watercock. Accepted on 22nd January 1960.
- With valve-seating and valve-head containing a sealing packing.*
64832. Imperial Chemical Industries Limited. New azo dyestuffs. (16th August 1957). Accepted on 22nd January 1960.
- Interacting naphthol like 1-amino-8-naphthol-4 and 6 sulphonic acids and diazonium compound of aminoazo compound obtained by coupling diazotised acylamine like 4-sulphamyl aniline with para-coupling amine like aniline.*
64894. G. Hilgers (Dr.-Ing.). Method and device for continuously producing fuel gas. (16th May 1958). Accepted on 21st January 1960.
- Characterized in that two eddy currents are formed of a carrier gas on the one hand, carrying the fuel substance to be gasified or converted.*
65065. Snia Viscosa Societa' Nazionale Industria Applicazioni Viscosa S.p.A. Process for the polycondensation of diamines and dicarboxylic acids. Accepted on 21st January 1960.
- Polycondensation of salts of dicarboxylic acid and diamines is carried out in the presence of organic liquids.*
65075. British Telecommunications Research Limited. Improvements in or relating to automatic gain regulators for carrier current telecommunication systems. (17th September 1957). Accepted on 20th January 1960.
- In which arrangements are made for causing voltage which varies according to level of received pilot current to be compared with voltage derived from resistor traversed by current supply to repeater station fed from external point and controlled thereat to have constant value.*
65076. Union Carbide Corporation. Filler material for evacuated insulation spaces. Accepted on 22nd January 1960.
- Comprising a low-conductivity component having a relatively high pressure sensitivity and large voids, and a second low-conductivity component having a low pressure sensitivity disposed primarily in the voids of first component.*
65273. Imperial Chemical Industries Limited. Process and apparatus for mixing granular materials. (7th March 1958). Accepted on 25th January 1960.
- Allowing measured amounts of materials to fall through series of screens each separated by an air gap from the other and apertures through one atleast of the screens laterally displaced relative to apertures of parallel screen, and subjecting granules collecting below screens to upwardly directed blast of gas to raise some of them a part of way back through series of screens.*
65291. A. H. Heenan. An improved pipe-coupling. Accepted on 21st January 1960.
- Wherein a male bulbous half and a female bulbous half both characterised by a circumferential groove in their inner surface.*
65391. Fuller Company. Fluidizing conveying apparatus. Accepted on 22nd January 1960.
- Conveying a finely divided material in substantially dry condition including a casing having means for admitting a material there into and a material outlet and comprising an upper conduit section and plenum chamber therebeneath.*
65633. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of isoeaxanthin dialkyl ethers. Accepted on 20th January 1960.
- Reacting 1:18-di-[2:6:6-trimethyl-cyclohexen-(2)-ylidene]-3:7:12:16-tetramethyl-octadecaheptaen-(2:4:6:12:14:16)-yne-(9)-diol-(8:11) with an alcohol in the presence of a strong acid to produce 15:15'-dehydro-isoeaxanthin dialkyl ether, partially hydrogenating the latter at the triple bond and isomerising the 15:15'-cis-isoeaxanthin dialkyl ether.*
65858. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the preparation of crystallized compounds of pyrrolidino-methyl-tetracycline. Accepted on 21st January 1960.
- Subjecting a suspension of pyrrolidino-methyl-tetracycline to the action of an acid selected from the group of citric, tarturic, malic, malonic, cinuamic or succinic acid.*
66044. N. V. De Bataafsche Petroleum Maatschappij. Polyphenyl ether lubricating compositions. Accepted on 21st January 1960.
- Consisting of a mixture of two or more polyphenyl ethers wherein the mixture has an average of 3 to 8 phenyl radicals per molecule.*
66096. Council of Scientific and Industrial Research. A process for the production of bacterial diastase. Accepted on 21st January 1960.
- Cultivating strains of Bacillus Subtilis or Bacillus mesentericus in an aqueous nutrient medium.*
66246. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Ortho-hydroxy-azo-dyestuffs and process for their manufacture. Accepted on 20th January 1960.
- The condensation product of 3-hydroxy naphthalic acid or its anhydride and ammonia or an amine, is coupled with a diazonium compound.*
66279. The Patent Tiffin Carrier Sanghvi Co. Electric toasters. Accepted on 21st January 1960.
- Comprising a frame with vertical heating element vertical guide rods each carrying a rack to hold toast and means for turning toast racks along guide rods so that racks travel towards or away from heating element.*
66584. Dunlop Rubber Company Limited. A closure for the base of a fluidised bed container. (7th February 1958). Accepted on 20th January 1960.
- Comprising a pair of rollers in peripheral contact adapted to permit passage of sheet material a longitudinal casing adjacent the fluid bed.*
66629. NATIONAL LEAD COMPANY. A mouldable material and method for making same. Accepted on 25th January 1960.
- The cellulosic material is partly or wholly covered with beads of polymer formed by catalytic polymerization in the presence of the cellulose of an aliphatic 1-olefine containing less than 6 carbon atoms.*

66630. Union Carbide Corporation. Thermochemical scarfing apparatus. Accepted on 21st January 1960.

Comprising scarfing bars with curved contours including a floating panel mounted in a supporting frame so as to permit movement in two mutually perpendicular directions and which carries an annular scarfing head together with centering means for maintaining the head in coaxial relation with a workpiece conducted thereto over a fixed conveyor bed.

66666. Dunlop Rubber Company Limited. Method and apparatus for the production of cellular synthetic rubber. (6th February 1958). Accepted on 22nd January 1960.

Incorporating a soluble inert gas under pressure into the liquid composition containing a polymer and a compound at a temperature below the reaction temperature of the polymer and the compound.

66883. The Goodyear Tire & Rubber Company. Liquid polyurethane reaction mixtures and methods for preparing and products made therefrom. Accepted on 20th January 1960.

Comprising a polyester prepared from at least one dicarboxylic acid and at least one glycol, the polyester having a molecular weight from 1500 to 2500, a hydroxyl number of from 45 to 75 and an acid number of not greater than 3, ortho dichloro benzidine and 3,3'-dimethyl 4,4' diphenylene diisocyanate.

67219. Imperial Chemical Industries Limited. Process for the manufacture of novel aromatic poly-amino-acids and salts thereof (18th April 1958). Accepted on 22nd January 1960.

A bischloromethyl aromatic compound is condensed with an aromatic amino-acid or salt thereof.

Opposition Proceedings

The opposition entered by The Indian Hume Pipe Co. Ltd. to the grant of a patent on application No. 53440 made by J. G. Talati, as notified in Part III, Section 2 of the Gazette of India dated 18th August 1956, has been allowed. A patent will not be sealed thereon.

Patents Sealed

59886. 63117. 63121. 63122. 63123. 63165. 63226. 63227. 63261. 63846. 64268. 64272. 64290. 64336. 64513. 64520. 64540. 64595. 64623. 64651. 64866. 65516. 65671. 65767. 65795. 66000. 66001. 66243. 66377

Amendment Proceedings

(1)

The amendment proposed by Universal Oil Products Company in respect of Patent Application No. 62155 as advertised in the Gazette of India Part III, Section 2 dated the 24th October 1959 has been allowed

(2)

The amendment proposed by Universal Oil Products Company in respect of Patent Application No. 62156 as advertised in the Gazette of India Part III, Section 2 dated the 24th October 1959 has been allowed

(3)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Universal Oil Products Company, a corporation organized in 1932 in accordance with the laws of the State of Delaware United States of America, and having their principal office at No. 30 Algonquin Road, Des Plaines, Illinois, United States of America, seek leave to amend the name and address of the Applicant in the application and specification in respect of Patent Application No. 65373. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (Form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

Restoration Proceedings

Notice is hereby given that an order was made on the 16th January 1960 restoring the patent numbered 54441 dated as of the 14th May 1954 granted to David Roberts And Company (Engineers) Limited for, "Improvements in or relating to scaffolding".

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs including in the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1. No. 101756. Bansilal Thakordas Kansara, an Indian Subject, Gandevi, Dist. Surat, Bombay State, India, "Metal trays", October 22, 1959.
